**ABSTRACT:-** People try to get a specialty quickly to start earning money as soon as possible. People do not try to gain knowledge.

Beyond capitalism is the resolution of problems. Less means should be used for anything.

That is the solution to the problem of climate change.

**Key word:** Adib Ben Jebara

### **WHAT PEOPLE SHOULD NOT BE DOING**

About what people should not be doing? People try to get a speciality quickly to start earning money as soon as possible. People do not try to gain knowledge.

People greatest efforts are to seek eating and sex which please the body.

It takes a lot of time to overcome hurdles for anything from the mind.

Many rules prevent great changes. Great changes are necessary because of the climate change being a great problem. Beyond capitalism is the resolution of problems. Less means should be used for anything.

That is the solution to the problem of climate change.

### **ABOUT THE GOAL OF THE LIFE**

About the goal of the life The goal of the life must be some achievement. Multi (disciplinarity is an achievement as multi-disciplinarity is not encouraged by the society.

To do like Descartes or Fermat is a good goal for a life. Beginning of text someone was called an honest man in the France of the eighteenth century if he had some

Knowledge of the sciences. The existence of the afterlife makes it mandatory to make good deeds for being able to reach the afterlife and not being confined

Being connected to the Good provides spiritual energy necessary for reaching the afterlife.

An activity of research is a good deed if a calling rather than a source of income.

To do a good work is a good deed.

### **ABOUT PEOPLE WHO DO NOT VALUE WHAT IS VALUABLE**

There should not be refusal of a job because of over qualification.

People should not leave to their children the concern of learning a lot of things but have the concern themselves.

People do not value intellectual level because researchers were not creative enough to solve great problems since 60 years ago.

Not to use a lot of formalism is something valuable and not valued.

In mathematics, we learn not to use a lot of means for the proofs.

In any business management, we have to look for results without using a lot of means for less problems.

Less complicated procedures reduce costs.

People have to value looking for less complicated procedures.

Cost effectiveness and time effectiveness are good goals.
